

ARIZONA AGD IMPLANT STUDY CLUB

The Arizona AGD hosted a hands-on implant study club with the help from Implant Direct on Wednesday, May 2nd. The night began with a lecture presented by Dr. Jaime Tobon outlining case selection and implant treatment planning.

Members were then able to participate in a simulation of implant placement with models and implant motors provided by Implant Direct.

This was a fun opportunity for members to discuss their implant cases with one another and experience simulated implant placement.
