

# MEDICAL EMERGENCIES FOR THE DENTAL OFFICE

Arizona AGD Members were invited to be a part of an innovative research project. The project offered CEUs on how to manage medical emergencies.

Part of the course even involved using high-fidelity mannequins. These mannequins were able to simulate breathing, blinking, talking, sweating, and real life medical emergencies like seizures and cardiac issues.

Through a grant supported by the Dental Trade Alliance Foundation, the course was free to members!
