

LET'S TALK ABOUT ADVOCACY!

Simply stated, advocacy is speaking on behalf of or in support of a specific cause or person. Advocating for the dental profession and our patients, can help ensure access to care, address health inequities, influence policy and legislation and mobilize resources.

Since legislation can impact how we provide dental care, now and in the future, it is important to be informed. Therefore, this blog has been created to provide information and updates on local and national legislation and to share opportunities to engage in advocacy activities. If there is a topic you have questions or concerns about, please reach out. Email us at ArizonaAGD14@gmail.com or check out our social media accounts on Instagram and Facebook. We would love to hear from you!
